PRODUCT TYPES	MANUFACTURERS	MODEL NO.	DESCRIPTIONS	PICTURES
Mouse	Contour Design Sales Rep: Lili Aguilar 818-481-2909 lilia@contourdesign.com	SliderMouse Pro - Slim (wireless)	The SliderMouse Pro is a centered mouse with mechanical sliderbar Dimensions - 15 in x 4.8 in x 0.9 in	
Mouse	Contour Design Sales Rep: Lili Aguilar 818-481-2909 lilia@contourdesign.com	UniMouse (wireless) Specify Left or Right-Handed	<ul style="list-style-type: none"> • Posture variation is the cornerstone of ergonomics, which is why we designed • Unimouse so that you can explore its 4 friction-based points of articulation to find your own unique comfort. • Effortlessly switch postures on the fly and engage different muscles and tendons while avoiding fixed, static positions. • Fully adjustable and may be inverted into vertical or semi-vertical mouse with tilt range of 35-70 degrees movable thumb support in all directions • Adjusts to fit all hand sizes. 	
Mouse	Goldtouch	Semi-Vertical Mouse (wireless (right-handed))	<ul style="list-style-type: none"> • The Goldtouch Semi-Vertical Mouse was created with an optimal slope of 66 degrees for the user who wants a mouse that is midway between a traditional ergonomic mouse and vertical mouse. • Unlike vertical mice, you'll have the power of gravity on your side when it comes to clicking, so you won't have to use as much movement between the thumb and fingers (which in turn can require more pinching of your muscles and nerves). • Sizing: Users with hands up to 7.5" can comfortably use this mouse. If the attachment flange accessory is added, users with hands up to 8" can comfortably use this mouse. 	
Mouse	Posturite	Penguin Ambidextrous Vertical Mouse (wireless)	<ul style="list-style-type: none"> • The vertical alignment encourages a more ergonomic operating position • Ambidextrous Design- Central 'bow-tie' switch allows for easy transition between right and left-handed use. • Easy-glide symmetrical base - Allows the user to rest either hand comfortably alongside the vertical structure, encouraging the use of the bigger muscles in the fore and upper arm to maneuver the mouse. Fine cursor control is still achievable with small hand and/or finger movements • Precision performance laser - Provides accurate tracking on typical work surfaces • Adjustable 400, 600, 800 or 1200 dpi settings- Encourages fast and precise operating movements • Precision scroll wheel - For fast, accurate document scrolling • Soft key touch - Low activation force and full key travel distance provides keying comfort 	  <p>Which Size? SMALL 0-6 ins MEDIUM 6-7 ins LARGE 7 ins + <i>(for guidance only)</i></p>
